ABOUT ME

Highly motivated and certified Junior Software Developer with 3 **years of practical experience** specializing in the design and delivery of custom business software using the **C#/.NET stack. Microsoft Certified,** proficient in developing administrative and operational systems for diverse sectors including logistics, insurance, and healthcare.
Proven capacity to translate complex business requirements into clean, functional, and efficient code. Eligible for **AEWV sponsorship** (single).

WORK EXPERIENCE

CUSTOM SOFTWARE DEVELOPER | FREELANCE / CONTRACTOR
Click Sistemas Inteligentes | Mexico | December 2023 – Present

Focus: Designing, developing, and deploying bespoke administrative and operational software solutions for a diverse client base.

Key Achievements & Responsibilities:

- **Administrative System Development:** Spearheaded the full-cycle development of several administrative systems (using C# and Blazor) tailored for sectors such as Insurance Brokers, Logistics/Port Services, and Private Clinics, resulting in streamlined data management and reporting.
- **Multi-Platform Solutions:** Developed cross-platform applications using .NET MAUI Blazor to provide unified access to core business data across desktop and mobile devices.
- **Specialized Applications:** Designed and implemented user-friendly, specialized applications, including Interactive Menu Creation tools for Restaurants and Educational Institutions, demonstrating strong ability to adapt technology to specific client needs.
- **Code Quality & Maintenance:** Ensured code longevity by focusing on efficient, maintainable code structures and thorough documentation.
- **Stakeholder Collaboration:** Successfully gathered and analyzed requirements from business owners and stakeholders to ensure final deliverables met functional specifications.

CORE COMPETENCIES & TECHNICAL SPECIALIZATIONS

Primary Expertise:
- .NET Development (C# - Microsoft Certified)
- Full-Stack Web Applications (Blazor, HTML, CSS)
- Desktop Application Development (Windows Forms)
- Cross-Platform Development (.NET MAUI Blazor)
- Custom Administrative Systems
